

He has brown eyes and very dark brown, nearly black hair. He lives in the countryside in a cottage with his fiancée. This donor is a Buddhist and was ordained as a monk several times early in his life. He is of slim and athletic build and leads an energetic lifestyle with few considerations for rest. The donor holds a foundation degree in his chosen career of emergency medicine, and is proudly on the way to completing his full bachelors degree. He also volunteers with the Armed Forces as a Combat Medic and the Army Cadets as a First Aid instructor. In his little free time this donor enjoys figure skating, programming robots and microcontrollers, full contact sports and spending time with his fiancée, to whom he proposed to in 2022, and intends to marry in 2025. This donor loves children, and looks forward to having some children of his own when the opportunity in his career presents itself. Perhaps a few dogs too. A tendency towards athleticism and mischief in youth, and diligence in adulthood presents itself in the family history, in addition to a strict code of honesty and integrity. All of the ancestors that the donor knows of were capable sportsmen while at school. Shortsightedness runs in the family also, which the donor corrects using contact-lenses

Goodwill Message

I am honoured that you have chosen my sample in order to have a child. Thank you for allowing me to help you in a beautifully unique way. When commencing this journey, I had little resolve to complete the process, but meeting some expectant and aspirant parents at the LSB gave me the resolve to commit to continuing my donations irrespective of the difficulties of travel from the South-West or the demands of working for the emergency services and the Army. Though I wish I could, as I am not a parent myself, so I feel ill equipped to give you any advice or guidance on raising the child that will result from your use of my donated sample. I only hope you are well equipped for raising a child, and merely ask that you cherish the miracle of new life you are bringing into the world. If you wish to have additional siblings, the LSB will work with you to provide additional samples. I would welcome contact [REDACTED] at any time, and would be happy to answer any questions you have. When I was born I weighed 2700g and was born on schedule. I had big eyes and interacted well with others from the get go. My parents describe the period before my memories to be characterised by laughter and quite an appetite. If you desire it, I would cherish the opportunity to meet you or your child one day. Otherwise I will of course respect your wishes without complaint. I hope you are ready, you have my every blessing
